

Curriculum Vitae

Dr. Sebastian Risi
Professor
IT University of Copenhagen
2300 Copenhagen, Denmark

sebastian.risi@gmail.com
voice +45-50250355
<http://www.sebastianrisi.com/>
German Citizen

Research Interests: AI in Games, Neuroevolution, Deep Learning, Artificial Life, Human Computation
Highlights:

- Over 1,5M€ total funding as PI
- Sapere Aude: DFF Starting Grant (one of the most prestigious Danish grants, 10% acceptance rate), 2019. Total award: 827,121 €
- Steering committee, Copenhagen [ELLIS Unit](#)
- Google Faculty Research Award 2019 (17% acceptance rate) and Amazon Research Award 2020.
- Distinguished Young Investigator award, 2018, International Society for Artificial Life.
- Over ten best paper awards.
- 2550+ citations, 28 h-index (Google Scholar)

ACADEMIC TRAINING

Postdoctoral Fellowship, Cornell University, Sep. 2012 - Sep. 2013
Advisor: Hod Lipson

Postdoctoral Researcher, University of Central Florida, Summer 2012
Advisor: Kenneth O. Stanley

Ph.D. Computer Science, University of Central Florida, Aug. 2008 - May 2012
Dissertation: Towards Evolving More Brain-Like Artificial Neural Networks
Advisor: Kenneth O. Stanley

Diploma Computer Science, Philipps-University of Marburg, 2007
Thesis: The Evolution of Cooperation in a Team of autonomous Agents with Plastic Neural Networks
Advisor: Manfred Sommer

CURRENT POSITIONS

Professor, IT University of Copenhagen. June 2020 - present

Co-founder and Research Director of Modl.ai, a company that is creating AI solutions to empower game developers, 2017 - present (10 employees).

Director of the Creative and Human-Centered AI Lab (CHAI)

Co-director of the [Robotics, Evolution and Art Lab \(REAL\)](#)

PREVIOUS POSITIONS

Associate Professor, IT University of Copenhagen. Aug. 2015 - June 2020

Assistant Professor, IT University of Copenhagen. Sep. 2013 - Aug. 2015

Machine Learning Consultant, Uber AI Labs 2017 - 2019.

Research Scientist, [Geometric Intelligence](#), a deep learning startup (acquired by Uber) 2016.

Co-founder and CEO. [FinchBeak LLC](#), a company that created casual social games enabled by next generation AI technology, Florida. 2012 - 2015

AI Software Developer. xaitment, a company that developed artificial intelligence for commercial computer games and simulations. Saarbrücken, Germany, Sep. 2007 - July 2008

GRANTS

- PI - Amazon Research Awards**, Total award amount: 79,867 USD, 2020.
- PI - DFF Sapere Aude**. "INNATE: Adaptive Machines for Industrial Automation". Total award: DKK 6,181,348.00 (827,121 €). March 2020 - Feb 2024 (10% acceptance rate)
- PI - DFF Project 1**. "QD2L: Improving Generalisation in Deep Learning through Quality Diversity". Total award: DKK 2,871,461 (384,251 €). June 2020 - May 2023
- PI - DFF-Danish ERC-programme** "GROW: Growing Lifelong Learning Machines Deadlines". Total award: 847.022 kr (113,350 €). Oct. 2019 - Feb 2021.
- PI - Google Faculty Research Award**, Total award amount: 67,348 USD, 2019 (17% acceptance rate).
- PI** for IT University of Copenhagen, Defense Advanced Research Projects Agency (DARPA) project *Super Turing Evolving Lifelong Learning ARchitecture* (STELLAR). ITU budget: \$500K, 2018 - 2021.
- Co-PI Horizon 2020 - Future & Emerging Technologies (FET) Proactive Flora-Robotica**. Total budget: €3,6M, ITU budget: €551K, April 2015 - April 2019 (3.6% acceptance rate).
- Industrial PhD grant** Innovations Fonden - "Improving Marketing Mix Decisions Through Interactive Bayesian Optimization", 2018. Award consists of one funded Ph.D. for three years. Budget: €140K
- German Academic Exchange Service (DAAD)** Postdoctoral Fellowship, 2012-2013.
Awarded: €32,232

RECOGNITION AND AWARDS

- Best Paper Runner Up** *IEEE Conference on Games* (CoG 2020), for Gonzalez-Duque*, Palm, Ha, Risi: Finding Game Levels with the Right Difficulty in a Few Trials through Intelligent Trial-and-Error.
- Distinguished Young Investigator award** 2018, International Society for Artificial Life. *For an individual early in their career that has already made important contributions to the field of Artificial Life.*
- Best Paper Award** *Audio Mostly* (AM 2018), for Scirea, Eklund, Togelius, and Risi: Evolving in-game mood-expressive music with MetaCompose.
- Winner of the Short Video Competition** *IEEE Conference on Computation Intelligence and Games* (CIG) 2018, for Volz, Schrum, Liu, Lucas, Smith, Risi: Evolving Mario Levels in the Latent Space of a Deep Convolutional Generative Adversarial Network.
- Best Paper Award** *Conference on Genetic and Evolutionary Computation* (GECCO 2018), for Volz, Schrum, Liu, Lucas, Smith, Risi: Evolving Mario Levels in the Latent Space of a Deep Convolutional Generative Adversarial Network.
- Best Student Paper Award** *Conference on Artificial Life* (ALIFE 2018), for Veenstra, Salas, Bongard, Støy and Risi: Intrinsic Mortality Governs Evolvability.
- Nominated for Best Paper Award** *9th Computer Science and Electronic Engineering* (CEEC'17), for Scirea, Togelius, Eklund, Risi (2017): Primal-Improv: Towards Co-Evolutionary Musical Improvisation.
- Best Paper Award** (out of 57 papers submitted) *IEEE Conference on Computational Intelligence and Games* (CIG 2017), for Poulsen, Thorhauge, Funch and Risi. DLNE: A Hybridization of Deep Learning and Neuroevolution for Visual Control.
- Virtual Creature Contest Winner** (out of 8), GECCO-217, for Veenstra, Faina, Støy, and Risi. Evolving Simulated Modular Robots.

Best Paper Award *Evolutionary Computation in Robotics (EvoROBOT 2017)*, for Lüders, B., Schläger, M., Korach, A., and Risi, S. Continual and One-Shot Learning through Neural Networks with Dynamic External Memory.

Best Paper Award *NIPS 2016 Workshop on Continual Learning and Deep Networks (CLDL 2016)* (out of 22), for Benno Lüders, Mikkel Schläger, and Sebastian Risi. Continual Learning through Evolvable Neural Turing Machines.

Best Paper Award *Evolutionary and Biologically Inspired Music, Sound, Art and Design (EvoMusArt 2016)* (out of 25), for Marco Scirea, Julian Togelius, Peter Eklund, Sebastian Risi, MetaCompose: A Compositional Evolutionary Music Composer.

Virtual Creatures Contest Finalists *Genetic and Evolutionary Computation Conference (GECCO-2015, Madrid, Spain)*, for Lisborg, A. and Risi, S., Evolving Flying EVCs With Novelty Search.

Best Paper Award Finalist One of 5 (out of 198) *Proceedings of the 5th International Conference on Intelligent Robotics and Applications (ICIRA- 2012, Montreal, Canada)*, for D'Ambrosio, D.B., Goodell, S., Lehman, J., Risi, S. and Stanley, K.O., Multirobot Behavior Synchronization through Direct Neural Network Communication.

Best Student Paper Award (out of 299 papers submitted with student first authors) *International Joint Conference on Neural Networks (IJCNN-2012, Brisbane, Australia)*, for Risi, S. and Stanley, K., A Unified Approach to Evolving Plasticity and Neural Geometry.

Nominated for Best Paper Award in Generative and Developmental Systems (2 of 20 nominated) *Genetic and Evolutionary Computation Conference (GECCO-2011, Dublin, Ireland)*, for Risi, S. and Stanley, K., Enhancing ES-HyperNEAT to Evolve More Complex Regular Neural Networks.

Best Paper Award in Artificial Life, Evolutionary Robotics, Adaptive Behavior, Evolvable Hardware (out of 42) *Genetic and Evolutionary Computation Conference (GECCO-2009, Montreal, Canada)*, for Risi, S., Vanderbleek, S., Hughes, C., Stanley, K., How Novelty Search Escapes the Deceptive Trap of Learning to Learn.

Best Paper Award in Generative and Developmental Systems (out of 20) *Genetic and Evolutionary Computation Conference (GECCO-2010, Portland, OR)*, for Risi, S., Lehman, J., Stanley, K., Evolving the Placement and Density of Neurons in the HyperNEAT Substrate.

To Students I advise: Tony Emile Yves Beltramelli, **Nominated for the best Master's thesis in Computer Science 2015** by the Danish Society for Computer Science. Niels Justesen, **Winner of an EliteForsk travel grant**, 2018.

65. Sebastian Risi and Kenneth O. Stanley (2012): A Unified Approach to Evolving Plasticity and Neural Geometry. In: *Proceedings of the International Joint Conference on Neural Networks* (IJCNN-2012). New York, NY: IEEE.
Winner of the Best Student Paper Award (out of 299 papers submitted with student first authors)
66. David B. D'Ambrosio, Joel Lehman, Sebastian Risi, and Kenneth O. Stanley (2011). Task Switching in Multiagent Learning through Indirect Encoding. In: *Proceedings of the International Conference on Intelligent Robots and Systems* (IROS 2011, San Fransisco, CA). Piscataway, NJ: IEEE. Note: This article is accompanied by a demonstration video at <http://eplex.cs.ucf.edu/patrolling.html>
67. Sebastian Risi and Kenneth O. Stanley (2011). Enhancing ES-HyperNEAT to Evolve More Complex Regular Neural Networks. In: *Proceedings of the Genetic and Evolutionary Computation Conference* (GECCO-2011, Dublin, Ireland). New York, NY: The Association for Computing Machinery.

Nominated for Best Paper Award in Generative and Developmental Systems (2 of 20 nominated in track)

68. Sebastian Risi and Kenneth O. Stanley (2010): Indirectly Encoding Neural Plasticity as a Pattern of Local Rules. In: *Proceedings of the 11th International Conference on Simulation of Adaptive Behavior* (SAB 2010). 533-543, New York, NY: Springer.
69. Sebastian Risi, Joel Lehman, and Kenneth O. Stanley (2010): Evolving the Placement and Density of Neurons in the HyperNEAT Substrate. In: *Proceedings of the Genetic and Evolutionary Computation Conference* (GECCO-2010). 563-57, New York, NY:ACM.
Winner of the Best Paper Award in Generative and Developmental System (out of 20 submissions in track)
70. David B. D'Ambrosio, Joel Lehman, Sebastian Risi, and Kenneth O. Stanley (2010): Evolving Policy Geometry for Scalable Multiagent Learning. In: *Proceedings of the Ninth International Conference on Autonomous Agents and Multiagent Systems* (AAMAS-2010), 731-73. Note: This paper is accompanied with a set of videos at <http://eplex.cs.ucf.edu/mahnaamas2010.html>
71. Sebastian Risi, Sandy Vanderbleek, Charles E. Hughes and Kenneth O. Stanley (2009): How Novelty Search Escapes the Deceptive Trap of Learning to Learn. In: *Proceedings of the Genetic and Evolutionary Computation Conference* (GECCO-2009). 153-16, New York, NY: ACM.
Winner of a Best Paper Award in Artificial Life, Evolutionary Robotics, Adaptive Behavior, Evolvable Hardware (out of 42 submissions in track)
72. Pascal Lehwark, Sebastian Risi and Alfred Ultsch: Visualization and clustering of tagged music data. In: *Proceedings of the 31st Annual Conference of the German Classification Society* (GfKI-2007), Freiburg, Germany.

INVITED TALKS AND PRESENTATIONS

- "Evolving Agents that Learn More Like Animals", **Invited Keynote**, Reinforcement Learning Virtual School (RLVS), April 2021.
- "Adaptive Game Playing Agents through Deep Neuroevolution", **Invited Keynote**, International Conference on Computer Games; Challenges and Opportunities (CGCO), 2021.
- Dagstuhl Seminar, **Invited Participant**, "Artificial and Computational Intelligence in Games: Revolutions in Computational Game AI", Dagstuhl, Germany, December 2019.
- "Recent Advances in Neuroevolution: From Super Mario Level Generation to Playing Doom from Pixels", Adelaide University, Australia, Oct. 2019.
- "Playing and Designing Games through Bio-Inspired AI", University of Malta, March 2019.
- "Artificial Intelligence – Towards machines that can continually adapt", Universal Grinding, Switzerland, May 2019.
- "Meta-learning in Games", **Invited Keynote**, Games and Games Intelligence (IGGI) 2018 Conference, London, Oct. 2018.
- "Evolutionary Meta-Learning", **2-day invited stay**, Facebook Paris (FAIR), June 2018
- "Creating Adaptive Machine through Evolutionary-based Meta Learning", **Invited Keynote**, Autonomy Day 2018, Oslo, Norway, May 2018.
- "Procedural Content Generation through Neural Network-based Approaches" **Invited Talk**, King Digital Entertainment, Stockholm, March 15th, 2018.
- "Why Video Games could be the Key towards Artificial Intelligence" **Invited Talk** hosted by Selskabet for Naturlærens Udbredelse, Copenhagen, October 2017 (over 200 participants)
- "Evolving Lifelong Learning Machines" **Invited Talk**. Google DeepMind, London, October 2017.
- Dagstuhl Seminar. **Invited Participant**, "Artificial and Computational Intelligence in Games: AI-Driven Game Design", Dagstuhl, Germany, November 2017.
- "Design Through Evolution" **Invited Talk**, InnoChain workshop seminar lectures at the Institute for Advanced Architecture of Catalonia (IAAC), Barcelona 2017.
- "Towards More Adaptive and Creative Artificial Intelligence in Games" **Invited Talk**, Golem.de Tech-Summit - Quo Vadis 2017, Berlin, April 2017.
- "Combining Deep Learning and Artificial Evolution" **Invited talk**, Current Trends in Artificial Intelligence, 1st DTU Compute Workshop, Copenhagen, Nov. 22nd 2016. Over 100 attendees.
- "Human Computation for Embodied Agents" **Invited talk**, Danish Embodied Artificial Intelligence Workshop, Odense, Nov. 10th 2016.
- "Evolutionary Robotics and Embodied Cognition" **Invited talk** at the Danish e-Infrastructure Cooperation (DeIC) conference about our DeIC eScience pilot project, Oct 4th, 2016.
- "Towards More Adaptive and Creative Artificial Intelligence" **Invited talk University of Essex**, AI Seminar, April 14th, 2016.
- "Bio-inspired, Automated Design of Machine Bodies and Artificial Brains" **Invited talk**. European Robotics Week in Prague, Nov 28th, 2015.
- "Generative and Developmental Systems" **Invited Talk**, Workshops about art and science: Artistic investigations into Robots and Plants, Nov 11th, 2015. National Autonomous University of Mexico. (through Skype)

“Will self-replicating evolving robots take over the planet?” **Invited talk for OpenITU**, October 24th, 2014 (OpenITU opens the ITU to the public, with topics in ICT publicly debated)

“Bio-inspired, Automated Design of Machine Bodies and Adaptive Brains” **Invited Keynote, PPSN 2014 Workshop on Nature-inspired Techniques for Robotics.**, September 12th, 2014

“Evolving Complex Patterns Through a High-Level Abstraction of Natural Development”. **Invited talk for Copenhagen School of Design and Technology (KEA)**, Copenhagen, Denmark, March 13th, 2014.

“Abstracting the Essential Properties of Natural Evolution into Evolutionary Computation”. **Invited talk for European Bioinformatics Institute**, Cambridge, England, July 7th, 2011.

“Adaptive Tactical Team-AI for Next Generation Bots”. **Invited talk for Microsoft Gamefest**, Seattle, Washington, 2008. A demonstration of the Counter Strike teams that I created during my time at xaitment is available here: <http://www.youtube.com/watch?v=-yWi1KEQRvg>

“Tactical Team-AI for Next Generation Bots”. **Invited talk for Quo Vadis Developer Conference**, Berlin, Germany, 2008.

PATENTS

Georgios N. Yannakakis, Christoffer Holmgård Pedersen, Lars Henriksen, Benedikte Mikkelsen, Sebastian Risi, Niels Orsleff Justesen, Julian Togelius. *Game bot generation for gaming applications*. US Patent 10,918,948 B2, granted Feb. 2021.

David D’Ambrosio, Sebastian Risi, Joel Lehman, Amy Hoover and Kenneth O. Stanley. *Generating Flower Images and Shapes with Compositional Pattern Producing Networks*. University of Central Florida. US Patent 20,130,083,016, granted March 2015.

TEACHING EXPERIENCE

Graduate Courses

Teacher and Course Manager, *Modern AI for Games*. ITU, Copenhagen, Fall 2013-present (around 40 students)

Teacher and Course Manager, *Data Mining* ITU, Copenhagen, Spring 2014-present (around 80 students)

Teacher and Course Manager, *Artificial Life and Evolutionary Robotics* ITU, Copenhagen, Spring 2014-2018 (around 30 students).

Teaching Training

ITU’s Assistant Professors Programme. IT University of Copenhagen. Completed May 2016.

Preparing Tomorrow’s Faculty Program. University of Central Florida, Summer 2012

Received training in course design, delivery of instruction, teaching strategies, collaborative learning and classroom management.

Other Educational Contributions

Guest lectures for *Evolutionary Computation*. Cornell University, 2012.

STUDENTS SUPERVISED

Current Ph.D. Students:

- Joachim Winther Pedersen, 2020 - present. Topic: Quality diversity deep learning.
- Miguel González Duque, 2019 - present. Topic: Evolving video games for cognitive rehabilitation.
- Mathias Kristian Kyndlo Löwe (industrial PhD), 2018 - present. Topic: Bayesian interactive optimization.
- Mads Johansen Lassen (co-supervised with Martin Pichlmaier), 2018 - present. Topic: Procedural content generation.

Graduated Ph.D. Students:

- Rosemary Lee (co-supervised with Laura Beloff), Graduated November 2020. Topic: Machine learning and the arts.
- Niels Justesen, Dissertation title: Algorithms for Adaptive Game-playing Agents. Graduated October 2019.
- Frank Veenstra (Flora-Robotica project; co-supervised with Kasper Stoy). Dissertation title: *The Watchmaker's guide to Artificial Life: On the Role of Death, Modularity and Physicality in Evolutionary Robotics*. Graduated May 2018.
- Marco Scirea. Dissertation title: *Affective Music Generation and its effect on player experience*. Graduated Oct. 2017. *Now: Assistant Professor position at the University of Southern Denmark.*

Visiting PhD students:

- Kazuya Horibe (Osaka University), visiting PhD student, Oct 2019 - August 2020. Topic: Morphogenesis of 3D structures.

Postdocs:

- Katt Walker, 2020 - present
- Rasmus Berg Palm, 2020 - present
- Djordje Grbic, 2018 - present
- Pablo González de Prado Salas, 2015 - 2018
- Stefano Nichele, Visiting Postdoc, August 2016 - December 2016
- Dan Lessin, 2014 - 2016

Head of PhD Defense Committee:

- Christoffer Holmgård, 2015

External PhD examiner:

- Alexander Hadjiivanov, 2019, University of New South Wales
- Daniele Gravina, 2019, University of Malta

Supervised over 50 Masters and over 30 Bachelor students

PROFESSIONAL ACTIVITIES AND OUTREACH

- Task Force Member, IEEE Technical Committee on Cognitive and Developmental Systems, 2015-present.
- Advisory Board, Apex Game Tools, 2015 - present
- Participated in the Fundamentals of Collective Adaptive Systems FoCa App Sprint 2014 (www.focas.eu), with the goal to produce widely accessible training/teaching material about collective adaptive systems.
- 2015 Nominated for election to the Board of Directors of the International Society for Artificial Life (ISAL)
- Judge for the Virtual Creatures Competition at GECCO 2014.

Editorships

- Guest Editor of a special issue on "AI in Games", KI - Künstliche Intelligenz (German journal of AI), to appear Feb. 2020.
- Associate Editor, IEEE Transactions on Games (ToG), 2020 - present
- Associate Editor for thematic area "Neural Systems", Genetic Programming and Evolvable Machines journal, 2019 - present
- Review Editor, *Frontiers in Evolutionary Robotics*, 2016 - present

Service to the University

- Evaluator for faculty positions: IT University of Copenhagen, Aalborg University
- ITU Subject Area Team Games, 2014 - present

Conference Organization

- Program Co-Chair, Foundations of Digital Games, August 2018, Malmo
- Track Co-Chair of the Complex Systems Track at GECCO-2018 and GECCO-2019.
- Co-Organizer, GECCO Virtual Creature Competition, 2017–2019.
- Co-Organizer, Symposium on Crossing into Physical Realms with Collaborative & Interactive Machine Learning, Co-hosted by the Centre for IT and Architecture (CITA) and the Robotics, Evolution and Art Lab (REAL), Feb 12th, 2016.
- Co-Chair, Workshop on Procedural Content Generation in Games (PCG-2015) at FDG 2015.
- Local-chair Evostar 2015, Copenhagen, Denmark, 8-10 April 2015 (the Leading European Event on Bio-Inspired Computation)
- Track Co-Chair of the Generative and Developmental Systems Track at the Genetic and Evolutionary Computation Conference (GECCO-2015).
- Organizing Committee, International Conference on the Simulation & Synthesis of Living Systems (Alife-2014), July 23-26, 2014, NYC.
- Track Co-Chair of the Generative and Developmental Systems Track at the Genetic and Evolutionary Computation Conference (GECCO-2014).
- Co-Chair, AAAI Symposium on How Should Intelligence be Abstracted in AI Research, November 15-17, 2013, Washington DC. Attendees: 38 participants and five keynotes of major leader of their respective fields (Andrew Ng, Stanford; Georg Striedter, UC Irvine; Randall O'reilly, University of Colorado Boulder; Risto Miikkulainen, UT Austin; Gary Marcus, NYU; Pierre-Yves Oudeyer, Inria France).

Reviewer and Program Committees

Reviewer:

- *Funding agencies*: **ERC** (external reviewer for a Starting and Consolidator Grant), The Icelandic Research Fund, Engineering and Physical Sciences Research Council (EPSRC; UK), South Africa's National Research Foundation (NRF), National Council of Science and Technology of Chile
- *Journals*: **Nature Communications**, PLOS ONE, Journal of Artificial Intelligence Research (JAIR), Neural Networks, Evolutionary Computation Journal, Frontiers in Neurobotics, Transactions on Computational Intelligence and AI in Games, IEEE Transactions on Evolutionary Computation
- *Conferences and Workshops*: **AAAI**, **NIPS**, International Conference on the Synthesis and Simulation of Living Systems (ALIFE), CHI Play, Foundations of Digital Games (FDG), Conference on Computational Intelligence and Games (CIG), AI and Interactive Digital Entertainment Conference (AIIDE), Genetic and Evolutionary Computation Conference (**GECCO**), Robotics and Autonomous Systems, Genetic Programming and Evolvable Machines, Workshop on Development and Learning in Artificial Neural Networks (DevLeaNN)

Membership

- IEEE (Institute of Electrical and Electronic Engineers)
- ACM (Association for Computing Machinery)
- AAAI (American Association for Artificial Intelligence)
- CIS (Computational Intelligence Society)

SOFTWARE AND GAMES RELEASED

- Artefacts** combines a sandbox-like environment akin to Minecraft with the ability to interactively evolve unique three-dimensional building blocks. Artefacts does not only allow players to collaborate by building larger structures from evolved objects but also to continue evolution of others' artefacts. Supervised creation by Cristinel Patrascu (Master Student). Released January 2016.
- FPSEvolver** is a competitive multiplayer FPS game in which a group of players can generate, play and improve levels to fit their particular preferences by voting on a selection of evolving levels. Supervised creation by Peter Thorup Ølsted and Benjamin Ma (Master Students). Released January 2015. Available at: http://peterolsted.com/thesis_game/FPS_Evolver.zip
- EvoCommander** is a game that allows players to interactively evolve neural networks and then switch between them during battle. Supervised creation by Daniel Jallof (Master Student). Release Fall 2014. Available at: <http://jallof.com/thesis>
- UnityNEAT** a port of SharpNEAT from pure C# 4.0 to Unity 4.x (using Mono 2.6), integrated to work with Unity scenes for evaluation. Supervised creation by Daniel Jallof (Master Student). Released fall 2014. Available at: <https://github.com/lordjesus/UnityNEAT>
- DrawCompileEvolve** website for drawing image that can then be further evolved interactively. Supervised creation of program by Rasmus Taarnby and Jinhong Zhan (Master Students). Released fall 2014. Available at: <http://rasmustaarnby.dk/drawcompileevolve>
- BrainCrafter** is an online program that allows users to manually build artificial neural networks to control a robot. BrainCrafter was designed to study how good humans are at building complex networks for control problems and if collaborating with other users can facilitate this process. Supervised creation of program by Peter Greve and Jan Piskur (Master Students). Released Fall 2014. Available at: braincrafter.dk
- Petalz** is a social Facebook game that demonstrates novel AI technology invented at the University of Central Florida. Petalz allows the player to breed an unlimited variety of different flowers. As the project leader I originated the idea for the game and supervised its creation. Petalz is the first game that combines unique user generated content with social gaming on Facebook and is the first product of our company FinchBeak LLC. Publicly available at: <http://apps.facebook.com/petalzgame>

ES-HyperNEAT C# is a public implementation of the evolvable-substrate HyperNEAT (ES-HyperNEAT) algorithm in C#. It is build upon the HyperSharpNEAT-Compatible Multiagent Simulator and Experimental Platform. ES-HyperNEAT is an extension of the original HyperNEAT method for evolving large-scale artificial neural networks. While in the original HyperNEAT the human user had to decide the placement and number of hidden neurons, ES-HyperNEAT can determine the proper density and position of hidden neurons entirely on its own while still preserving the advances introduced by the original HyperNEAT. Released Spring 2012. Available at: <http://eplex.cs.ucf.edu/software.html>

HyperSharpNEAT-Compatible Multiagent Simulator and Experimental Platform is an extensible single- and multiagent experimental platform. It contains an updated implementation of HyperSharpNEAT that is a modification of the SharpNEAT package by Colin Green. The package includes an implementation of the room-clearing experiments described in our AAMAS 2010 paper. Released Fall 2010, Eplex Research Group, UCF. Available at: <http://eplex.cs.ucf.edu/software.html>

Databionic ESOM Tools is a suite of programs to perform data mining tasks like clustering, visualization, and classification with Emergent Self-Organizing Maps (ESOM). Databionics Research Group, University of Marburg, Germany. Available at: <http://databionic-esom.sourceforge.net/>
